

WELDED ALUMINUM DURABENCHES

Upgrade Your Greenhouse with Durable, Professional-Grade Benching

Arcadia's DuraBenches are built from welded aluminum with nylon tops, providing a strong, durable, and easy-to-maintain work surface for greenhouse growers. These benches are engineered to withstand decades of gardening use.

BENCH SIZE	STANDARD HEIGHTS
2' X 8'	32" or 36"
3' X 8'	32" or 36"
4' X 8'	32" or 36"

Custom sizes available on request

Why Choose Our DuraBenches?

- **Rust-Proof Aluminum Frame**
Welded for superior strength and long-term durability.
- **Removable Adjustable Height Legs**
Level your bench effortlessly on uneven surfaces.
- **Durable Nylon Top**
1" square holes allow for airflow and drainage. Lightweight and easy to clean.
- **Custom Sizes Available**
Designed to fit your greenhouse layout perfectly.
- **Quick, Easy Assembly**
Spend less time setting up and more time growing.

ADDITIONAL ACCESSORIES

Greenhouse Sink Unit

A convenient workstation for watering, potting, and cleanup. The sink unit combines a durable aluminum frame with a deep stainless basin that resists rust and staining. Designed for easy drainage, it can be fitted with a standard hose connection or plumbed directly into your greenhouse water line.

Potting Table

A versatile greenhouse workstation designed for potting, transplanting, and daily use. The Potting Table features a smooth aluminum work surface paired with a lower shelf for airflow, drainage, and convenient storage. Built from welded aluminum for long-term durability, it integrates seamlessly with our other bench systems while providing a dedicated space for hands-on work.

Tiered Bench System

Built for efficient use of space and high-volume growing, the Tiered Bench System provides multiple levels for organizing plants by size or light requirements. Each tier offers sturdy support with open slats for airflow and drainage, and is designed to integrate seamlessly into your greenhouse layout.

Wall-Mounted Shelf

A clean, space-efficient shelving solution that mounts directly to greenhouse walls. Constructed from corrosion-resistant aluminum with slatted surfaces for airflow and drainage, this system maximizes usable space while maintaining a streamlined, architectural look.
